

ABSTRACT OF THE DISCLOSURE

A yield percentage managing method manages  
a yield percentage of a target processed product  
with respect to at least one target raw material by  
5 use of a computer. The yield percentage managing  
method corrects or updates the yield percentage  
based on a processed amount K which indicates a  
total number or weight of target items of the target  
processed product processed from the target raw  
10 material.
